- Complete restoration and rebuilding

Mold and its remediation is another area of capability for Teasdale Fenton. We work in conjunction with the property owner, the insurance representative, as well as an industrial hygienist to formulate the most efficient and effective course of action following the IICRC S520 guidelines. The highest level of care is taken in the handling of the mold-affected area, from containment of the area, to all persons in the area being protected by personal protective equipment. We ensure that not only the structure is remediated to acceptable levels, but also the contents within the affected area. We are committed to returning your property to pre-loss conditions quickly and effectively, and work closely with you throughout the process to ensure your satisfaction.
