Tile & Grout

The **first** challenge that most facility owners/managers face with this type of floor covering is restoring the grout to its original color. The **second** is proper maintenance once the desired results are met! Rest assured, Teasdale Fenton has researched and formulated a true scientifically based system that eliminates both challenges using their state-of-the-art Mobile Cleaning Unit and exclusive chemicals specifically designed for tile and grout.

Natural Stone

There are over 9000 different types of stones and in most cases in-house and/or janitorial cleaning firms create most of the problems due to the use of "all purpose" or "multi-purpose" cleaners. These cleaners can damage, dull and etch many types of natural stones. At Teasdale Fenton, we only use effective chemicals specifically designed for Natural Stone. These specific chemicals coupled with our exclusive cleaning process allow us to clean and restore the most abused natural surfaces providing exceptional results. Don't take our word for it, allow our "gloss meter" the opportunity to prove to you the results we can achieve and maintain.

Mobile Cleaning Unit

- Self Contained 2200 psi pre-filtered water
- 300 degree continuous water capabilities
- Multiple Story capabilities (25 floors)
- Surface area dry time less than 5 minutes
- Carpet cleaning ability

Teasdale Fenton is able to restore your hard surfaces to their original beauty. Through our perpetual cleaning programs we are able to assist in keeping them that way. Allow us to prove the results we can accomplish, set up a **FREE** demonstration. Call our office or ask your sales associate to schedule a date and time that work best for you.
